

Annual Report 2013-2014

Splendour and gaiety marked IDC and FDI during the year

About IDA

The Indian Dental Association represents over 60,000 dental professionals. IDA is the parent body of dental associations spread over 29 State branches and their over 360 local branches. We are committed to dental excellence and promoting the art, science and practice of dentistry. Our vision is to lead the country to optimal oral health and hygiene for all the people in our efforts to improve the general health index of the country, since oral health is an integral part of general health and wellbeing. This vision is sought to be realized through our leadership role in pioneering prevention, generating awareness, improving access to affordable dental care, and promoting continuing education for professional advancement of our members and delivery of quality oral care services to the community.

Message from the President

Dr. Mahesh Verma
President

*"A man is valued not by what he gets
but by what he contributes"*

Dear Members,

It gives me great pleasure to present to you the Annual Report of the Indian Dental Association for the year 2013-2014. At the outset, I must say that it has been an extremely remarkable year in which the Association has been able to cross several milestones in the provision of oral healthcare services to the community. IDA's relentless efforts at fostering new partnerships and exploring new approaches to oral health promotion was rewarded when IDA was given the privilege of hosting the FDI 2014 Congress in India by the FDI World Dental Federation. It has certainly helped IDA in its continuing endeavour to improve its national and global visibility. Needless to say that through dedication, determination and commitment to its social responsibility of leading the country to optimal oral health, IDA has been able to carve out a niche for itself in the global Oral Health Atlas.

A matter of great pride for IDA during the year under review was the hosting of the world's largest dental congress, the FDI 2014 Annual World Dental Congress. That the congress was inaugurated by none other than the Hon'ble President of India was in itself a proof of the importance attached to oral health by the government. Personally, it was indeed an honour to share the dais with the Hon'ble President of India and the FDI President. The hosting of the FDI Congress was an exhibition of the great organizational capability of IDA backed up by equally aggressive promotional efforts. I must place it on record that everyone with single minded devotion rose to meet the challenge of staging a grand congress.

The event also witnessed the launch of a few oral healthcare initiatives aimed at improving the oral health scenario in the country. All in all, it was an extremely satisfying year, I must say. And the election of the Hon Secretary General to the FDI Council caps a wonderful year for IDA and oral health.

I firmly believe that IDA's accomplishments will be judged not on how well it has served its members but in promoting oral health awareness and hygiene among the masses, as it alone can improve oral health scenario in the country. The Programmes on National Oral Health, Tobacco Intervention Initiative and Child Dental Centre have all caught the imagination of the global audience as capable of leading the country to optimal oral health and it is for us now to take these programmes forward through ambitious initiatives to implement them. You all will agree with me that any programme designed for securing optimal oral health should necessarily focus on effective implementation. In this respect, I must confess that the programme on Oral Health Month with emphasis on educating people about good oral care habits and dental hygiene as also the Live, Learn and Laugh programme has had the desired effect in ensuring good oral healthcare among the people. The State and local branches need to be much more active in this regard. IDA has drawn up a programme with emphasis on targeting beneficiaries in association with likeminded agencies committed to oral care. I am very hopeful that, with your support and cooperation, IDA should be able to march ahead and win fresh laurels.

I wish to express my sincere gratitude and sense of appreciation of the cooperation and support provided by the State and Local Branches in making my tenure as the President an enjoyable one. I must confess that, but for the excellent cooperation and support from the Hon Secretary General and all the other office bearers of IDA, I would not have been able to accomplish whatever little I have been able to. IDA has survived several trials of strength during the year and I owe a great deal of debt to them for their valuable support in leading IDA to host the world dental congress and emerge successful and stronger. It's indeed been a pleasure to work with such a wonderful team of people with enthusiasm and energy. It's now for the young brigade to take IDA forward for which you can always count on my support.

I take this opportunity to convey to all our dear members Season's Greetings and hope that you'll rededicate yourselves to strengthen IDA in its endeavour to achieve the goal of optimal oral health for the masses.

Dr. Mahesh Verma
National President

Message from the Hon. Secretary General

“Never notice what has been done....only see what remains to be done”.

Dr. Ashok Dhoble
Hon Secretary General

Dear Members,

I am happy to welcome you all to this great garden city. The year under review has been marked by outstanding achievements. They helped improve the visibility and credibility of IDA both as the custodian of oral health and an institution committed to lead the country to optimal oral health. It has established IDA as the prime mover safeguarding oral health of the nation, besides promoting professional advancement of its members.

The year just gone by, heralded the dawn of a new era for IDA. The crowning glory was the hosting of the prestigious FDI 2014 Annual World Dental Congress in India. I am happy at the way everyone rose to the challenge and delivered an outstandingly successful congress, hugely appreciated by one and all. I feel a sense of pride that the numerous challenges encountered were addressed in a manner that belied belief which speaks volumes about our adaptability. It's a lesson in collaborative partnerships and organizing ability and I am extremely thankful to everyone involved in this stupendous show of strength and ingenuity.

Against this background, it gives me great pleasure to present to you the Annual Report for the year 2013-14, summarising the successes and achievements of IDA during the year.

The main activity of IDA during the year under review was the successful hosting of the FDI 2014 Annual World Dental Congress in Greater Noida. The FDI officials were extremely happy with the organization of an “outstanding” congress. The participants numbering nearly 20,000/- were very much pleased and proud to have shared this event with one and all.

The scientific programme addressed by over 100 distinguished speakers sharing their erudition and scholarship with delegates was a great success. It's expected to usher in a new age in the prevention of dental diseases and facilitate provision of total oral care among people of all segments in the country.

The dental exhibition was a huge draw. Visitors were able to see and experience hundreds of evolving equipment and materials displayed which served to highlight the future trends in dental science. The programmes firmly established dental science within the context of public health policy and the imperative need for linking oral health with general health. I must add that the congress recorded participation by a large number of exhibitors. I'm thankful to all the exhibitors and delegates for their support and cooperation.

The India Evening focused on the evolution of the cultural heritage added spice to the inaugural ceremony.

It's a matter of great personal satisfaction that the IDA has been witnessing substantial growth in its activities as also membership. At the same time, I must admit that, considering the number of dentists in the country, there is scope for increasing membership, which we must target.

IDA always has the interest of its members and the people in mind. Consistent with this concern, it has launched several health initiatives to provide better service to the society. These have led to greater visibility of IDA's pioneering activities. Launch of new programmes conceived to make the country 'Cavity Free', to make teeth strong to sustain the smile (Happy Smile Healthy Smile) and commencement of celebrations to commemorate the 125th birth anniversary of Dr R. Ahmed, the founding father of Indian dentistry, was also well appreciated. I acknowledge the contribution made by sponsors and several other agencies associated with the organization of the congress to make it a success.

I appreciate the excellent cooperation and support extended by the CC members whose direction and guidance were valuable in performing my duties. The Presidents and Secretaries of state and local branches were very cooperative and extended valuable support. I also want to appreciate and acknowledge the hard work and dedication of our staff. We are fortunate to have an excellent group of talented individuals. And their professionalism and commitment are paramount to the success of IDA.

IDA is your organization and its achievements and successes are yours. I feel a sense of fulfilment at what we have been able to accomplish but there's a long way to go and I need your cooperation and support in taking IDA to higher levels of excellence.

Dr. Ashok Dhoble
Hon Secretary General

Dr. Ashok Dhoble

Elected to the FDI Council – A Rare Honour

Dr. Ashok Dhoble, Hon Secretary General of the Indian Dental Association, has been elected to the FDI Council at the General Assembly elections held at the 102nd Annual World Dental Congress of the FDI World Dental Federation. He is the first Indian to have got elected to the FDI Council from India. His wide and vast experience in the field of oral health should stand him in good stead in serving the global community and help FDI in securing the goal of leading the world to optimal oral health – a goal very dear to his heart. Being committed to attaining optimal oral health for all in the country, all of us in IDA – IDA members, CC members and office bearers, IDA Branch presidents and secretaries and the entire staff of IDA – congratulate him on this unique honour and wish him a successful and productive tenure at the FDI Council meetings.

IDA Activities: Review of Performance

"Sight is the ability to see the physical world while vision is the gift of seeing beyond it."

Commitment to Dental Excellence

Members are well aware that our primary objective is the eventual attainment of optimal oral health for all and promoting professional advancement of our members. Consequently, all our efforts are directed towards attaining these dual goals. This calls for sustaining the momentum of activities initiated that have established IDA as an enviable institution committed to dental excellence. Globalization of dentistry and the resultant changing technologies bring with them newer challenges which need to be addressed in the true spirit of global competition. Seized of this new challenge, IDA has been making all efforts to establish, through international collaborative endeavours, opportunities for developing professional careers and enhancing skills to remain an

undisputed, authoritative and independent organization of the dental profession.

IDA Office Infrastructure

Consistent with the need to project a new global image in the context of FDI Congress and to remain in the forefront of innovation to face the emerging global challenges, a larger office infrastructure became an imminent requirement. This was in keeping with the expanding role of IDA both within the country and outside. The office infrastructure consequently had to conjure up with innovative mechanisms for mobilising resources and harnessing opportunities in varied spheres that this growing need called for.

To meet with the emerging need, IDA has moved its operations last year to a new office with nearly 6000 sq ft.

It is conveniently located in the heart of central Mumbai, near Dadar, at Prabhadevi.

While renewed efforts at corporatisation of IDA continued, efforts are on for IDA to have its own office building and facilities. At the same time, streamlining the functioning of numerous projects and programmes is being attempted for better operational coordination and marketing so as to ensure a steady flow of revenue. With these changes, IDA has assumed an iconic image and a new urge for promoting professional advancement of its members and encouraging enhanced oral healthcare awareness among the people. These developments have no doubt transformed IDA into an exciting institution of professional repute.

IDA and Data Management

To facilitate prompt functional integration and coordination of activities, IDA has set up a well managed and proficient system of data management. The data management system developed has enabled IDA to better organize its membership registrations and renewals, continuing dental education programmes and a host of such other activities with apparent ease hitherto unknown.

Members are aware that the advanced software systems developed have enabled IDA to access data of IDA office bearers, both State and Local Branches, national and international dental associations, conferences and workshops, dental colleges, universities, dental product manufacturers, and the like.

The system developed, in addition, permits access to a vast body of dental personnel in the country and data pertaining to their gender, qualifications, specialities, and clinical facilities. A range of other software packages intended at instituting systems and procedures for improving efficiency and performance standards and improving communications have also been developed. While this has, no doubt, enabled IDA in ensuring better communication with its members and the various branches, it has also helped in the systematic planning and execution of various programmes and projects.

Development of a general database is another noteworthy activity that the IDA can be proud of. This general database presents a storehouse of information on dental manufacturers and

their products, suppliers, video libraries, placements, forthcoming events, list of dental colleges and universities, dental laboratories, etc.

IDA and International Affiliations

Members are quite aware that in these days of global competition and rapid advancements in dental science, professional institutions are constantly challenged to reorient and refurbish their professional approaches to remain in the limelight and to garner support and visibility. Professional affiliations with regional and international bodies and collaborative endeavours enable IDA to come out successful in its effort to meet the emerging professional challenges.

IDA's affiliation with renowned global associations such as the Federation of Dentaire International (FDI), Commonwealth Dental Association (CDA) and the International Association for Dental Research (IADR), etc, has immensely benefited members. Members are aware that this formidable alliance has made it possible for representation of quite a few IDA office bearers to adorn various prestigious positions in these bodies.

IDA and Membership Development

"Membership development calls for a pragmatic approach to change based on meeting the needs of both the members and the organization"

The Aim

An institution is known by its people and the service it renders to the community thus creating awareness of the importance of membership growth to serve the fraternity. Sustenance of any institution depends on the inherent strength of its members and how wide the organizational base is. The membership development goal clearly is to widen the membership base with a view to building a strong organization of dental professionals committed to the cause that IDA stands for. IDA aims at becoming a global knowledge centre that builds synergies between education, research, and dental enterprise. Towards this goal it has been working through its dual missions of excelling in education, research and service, at the same time fostering creativity, innovation and enterprise to aid the community and the fraternity. To realize this goal, it is essential to build a broader and stronger foundation with young and willing people who are always eager to carry the torch with a missionary zeal. The endeavour is to create and sustain an environment conducive to the growth and development of dental professionals in the country.

The membership development drive was motivated by the eagerness to put the Indian dental community on an equal footing with similar global institutions. Membership of IDA enables: (a) learning of, and getting an insight into, global trends that have a bearing on the dental profession through its "website"; (b) sharing of one's best practices with other professionals; (c) access to IDA helpline; (d) enhancing professional competence through access to CDE programmes and concessionary registration fees for national and international conferences and (e) complimentary copy of The IDA Times. It also helps the member to get involved in important initiatives of IDA like the Tobacco Intervention Initiative, Emergency Dental Centre, National Oral Health Programme, CDE and the like.

Online Membership Registration

A new era of smooth and simple procedure of online registration has certainly led to an increase in membership and has done away with any hassles associated with the earlier membership procedures. With the facility of communication now being conducted in electronic language, the entire mechanism has now been made more member-friendly, smoother and simpler. Attractive privileges are on offer for the aspiring members which the member can avail of with the aid of IDA Membership card.

Membership Kit

As a part of the IDA outfit, a member is privileged to receive a Membership Kit on enrolment. This includes a Membership Card, Membership Certificate, two colourful Membership Stickers and Lapel Pins. The new Smart Card displays membership details like Registration Number, which remains permanent irrespective of a change in location or place, the State, Branch code, etc. The card with user ID can also be used for accessing our website: www.ida.org.in. The Membership Certificate reflects the commitment of IDA to dental excellence. The Lapel Pins are effective advertising and image building medium and serve as identification to other IDA members, medical professionals and patients. Better privileges and novel schemes are being planned as a part of the new membership development drive.

Value Added Privileges to Members

The IDA-Central Bank Credit Card offers to the IDA members a host of services covering CBI Medical Equipment Loans and Personal Loans besides collecting reward points and redeeming them.

A host of value added services and benefits can be enjoyed by IDA members, as in most international dental associations. An IDA member can become a participant and get involved in important national initiatives of IDA like SPOT and TII Centres, Child Development Centre, Educational Training Centres and CDE, Emergency Dental Centre, and the like. These avenues offer an opportunity to enhance their professional attainments.

Payment of annual subscription fee can now be made with the help of the card. Likewise, registration at State, National or International Conferences organized by IDA can be made at reduced rates as offered in case of FDI 2014. An IDA Member can become an ADA Member by paying only US \$12 instead of \$ 75.

The Enigma

The importance of active members in an organization of professional repute like the IDA cannot be gainsaid, inasmuch as it, besides projecting an enduring image, also enables IDA to derive its strength from its members. Considering the large number of dentist population in the country numbering nearly 200,000, the present membership strength leaves much to be desired. Hence there is an imperative need to sustain the membership drive with a view to augmenting the number.

The members are now in a position to access information online and update details and renew membership. Opening of accounts by branches with State Bank of India has facilitated easy and speedier transfer of branch shares. These entire have, to a great extent, made IDA move forward. The new membership software

enables members to track the progress of their applications for membership or renewals.

Need for Action

Considering the large number of dentist population in the country, the present annual membership strength leaves much to be desired. Vigorous efforts need to be made by all concerned to improve the number of primary membership. At the same time, the challenges posed by the calls of regular renewals, updating of personal information of members, etc., need to be suitably addressed. The need to strengthen the membership drive with a view to augmenting and widening the base has to be sustained.

Branch Formation

Branch expansion is an index of growth of an institution. Quite a few of branches have been established during the year under review. Members would be happy to know that during the year 8 new branches were opened. They were:

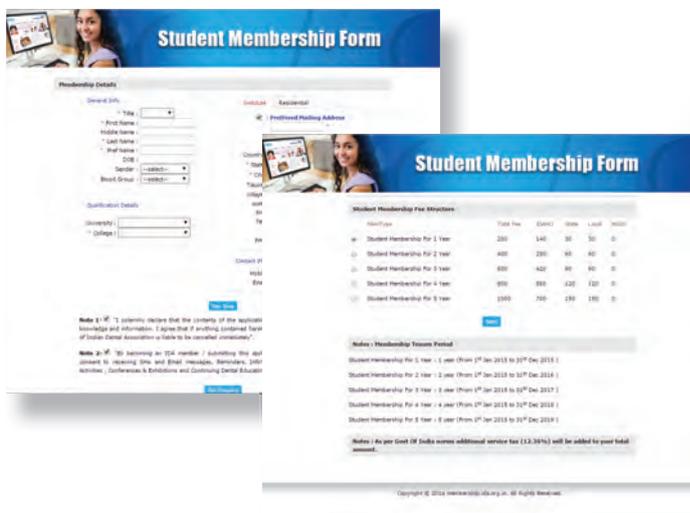

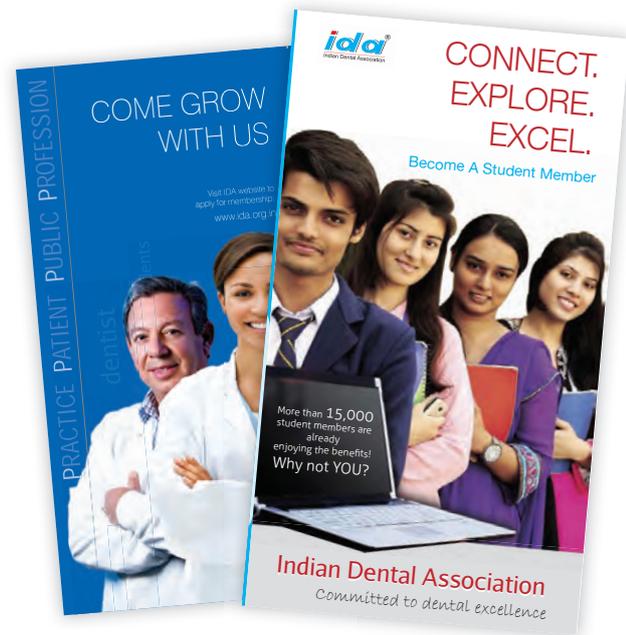

Andhra Pradesh 2 (Adilabad and Tanuku); Chattisgarh 2 (Bilaspur and Rajnandgaon); Gujarat 1 (Godhra); Haryana 2 (Kurukshetra, HP Kangra), and Jharkhand 1 (Hazariabag).

Student Membership

The privilege of IDA membership is open to all dental students. Student membership has shown a consistent increase in the last couple of years. As on November 2014 the student membership numbered 8920. IDA membership offers the students a professional platform to discuss topical issues or important matters in dentistry including dental education ranging from reforms in undergraduate education and career options to the influence of international policy on health, new treatment techniques, etc.

IDA and Membership Promotion Booklets

Members would be happy to know that with a view to enlarging membership base, specially compiled information booklets have been made highlighting a host of information on IDA, its organizational set up, activities and the procedures to be followed to become its member for the benefit of the potential members.

Brand IDA

*"Don't judge each day by the harvest you reap,
but by the seeds you plant"*

Members might recall that consistent with its ubiquitous brand image and the various projects that IDA has been undertaking, separate logos, unique to the specific activity being undertaken such as Oral Cancer Foundation, Tobacco Intervention Initiative, Child Dental Centre, to name only a few, have been developed and are currently in use. The State and Local Branches, too, have been displaying these unique logos at various conferences as well as on their IDA letterheads. We are quite appreciative of the efforts made by the branches to enhance the image of IDA and its position as the custodian of oral health in the country. Be that as it may, building a unique brand IDA brooks no delay.

Members are well aware that organizations these days are known by their branding strategy. Brands play an important role in marketing the organization and its services. In keeping with its growing importance and expanding role, IDA has recently developed, with the help of Samsika Marketing Consultants, the Brand IDA aimed at projecting a singularly unique symbol to reflect the visual image of IDA for use to garner greater visibility and prominence. The Brand IDA gives it a distinct identity and the promotion of the brand through the visual media and audio set up has been greatly appreciated by one and all. Members would be happy to know that a video made on Brand IDA is being telecast on a few multilingual channels everyday at prime time with a view to marketing of services and enhancing the image of members.

A PDF file of the ad showing the selected channels that would telecast the Brand IDA has already been sent to the editors of journals being brought out by branches. Compact discs containing the video have been sent to all state and local branches as also members for use by them.

IDA IDA Oral Health ke Saath Jiye.... Daaton ki Shaan, Chehre ki Muskaan!

IDA - The Voice of The Dental Profession

"Publications constitute the fountainhead of conceptual thinking"

IDA publications cover a wide range of dental subjects and events of great practical relevance to members. They act as catalysts for change. They provide a platform to the dental professionals to publish and share their valuable experiences and clinical skills. Consistent with the need to create awareness about oral healthcare and hygiene, they try to reflect not only the scientific advancements in dental science, but also the state of the art technology and dental products that have great significance in dental practice. IDA attaches great importance to oral healthcare and hygiene and makes use of the medium of these publications to promote oral health awareness among the people aimed at attaining optimal oral health for all, its avowed objective.

Presently there are eight publications that come out of the IDA Publishing House. These include: The IDA Times, JIDA and Clinical Dentistry, Oral Health, Product Profile provides technological updates of significance to dentists while Student Digest serves the needs and requirements of dental students. Dental Events is a dental education calendar.

The IDA Times

The IDA Times, the official mouthpiece of the dental fraternity has now completed a decade of eventful publishing. The publication has developed a unique role in continually educating the dentists in the country and keeping them updated of the global changes taking place in each speciality of dental science. It further informs its members of the activities of IDA and helps enhance their image. In doing so it has done admirable and laudable service to the dental profession in the country while, at the same time, sustaining the tempo of an expanding dental market and dental profession in the country.

Oral Health

The publication, Oral Health, is borne out of IDA's commitment, as the custodian of oral health, to improve the oral health scenario in the country. The publication marks a new beginning in generating among the people greater awareness of the oral health issues.

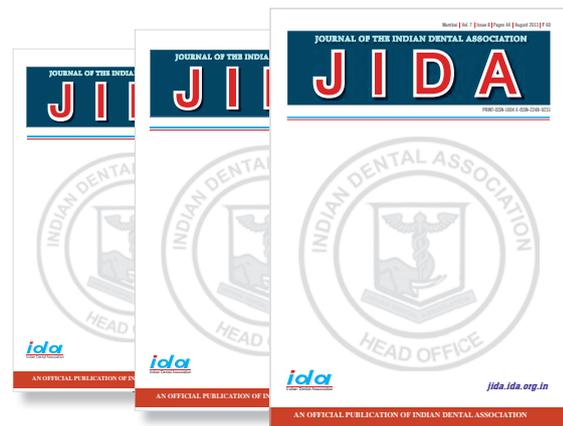

It educates of the need to improve oral healthcare and hygiene for overall health. By educating the public on the basics of teeth and their care, it has been contributing immensely to raising oral health awareness in the country.

Seized of the essential need to improve oral healthcare and hygiene and to continue its drive for better oral health, the publication brings out issues appropriate to the need of various segments of the population in an effort to make oral health a part of the national oral health policy. Its mission is to achieve the ultimate goal of healthy teeth and pleasing smile for everyone.

Journal of IDA - JIDA

Clinical research and related issues are of paramount importance to the dental community. The Journal of Indian Dental Association (JIDA) is a true example of making a strong statement that clinical research contributes to the delivery of quality service to the community. It's a matter of great happiness to report that the publication of JIDA devoted to dental research has been receiving good response from members. JIDA has been providing a platform for students, academicians and research scholars alike to undertake innovative research into the various facets of dental science. After sorting out the numerous technical issues, we have now commenced resumption of the publication of the Journal.

Clinical Dentistry

Dental science has been evolving at a rapid pace, developing newer concepts and opening up newer avenues for further research. In the fast changing world, we need to keep pace with the developments in dental science lest we may be left far behind, particularly in a globalised environment. Clinical Dentistry attempts to keep abreast of the current advancements in dental science in the pursuit of professional excellence in dentistry. The journal reflects the numerous materials, techniques and technological advancements that have their relative significance in clinical practice.

Product Profile

The publication Product Profile provides technical updates of products and materials which are of great importance to the practising dentist. There is no gainsaying the fact that in an era witnessing a global dental revolution, dental products and materials assume tremendous significance. They are extremely important not only to put the patient more at ease but also to make the dentists' operations much more comfortable and their life a lot easier. Product Profile focuses on providing comprehensive information on the numerous products with varying operational range, their technical highlights and their relative merits and demerits to enable dental professionals to zero in on the choice of their requirements.

Members would be happy to know that the scope and coverage of the publication has since been expanded to make it more interesting and attractive. The redesigned, improved

and expanded 'Product Profile' has added several new exciting features that provides comprehensive information such as a featured companies, buyer's guide, category profile, dental therapeutics, tech insights, and so on. This new 'avatar' of Product Profile has had encouraging response from all concerned which augurs well for all of us.

Student Digest

'Student Digest' is a publication devoted exclusively to dental students and their needs and requirements and addresses all those issues that the students are agitated about. Dental science has been passing through continuing changes. Change is dynamic and it is dynamism that brings about a new orientation, a new look and a new model that makes movement to higher levels possible.

Student Digest focuses on all those issues that would prepare the bright young minds to face the emerging challenges of their professional future. The idea is to provide the students a direction and guidance to enrich their academic approach and blend it with the changes and advancements overhauling dental science to enhance their skills and equip them to develop their professional career.

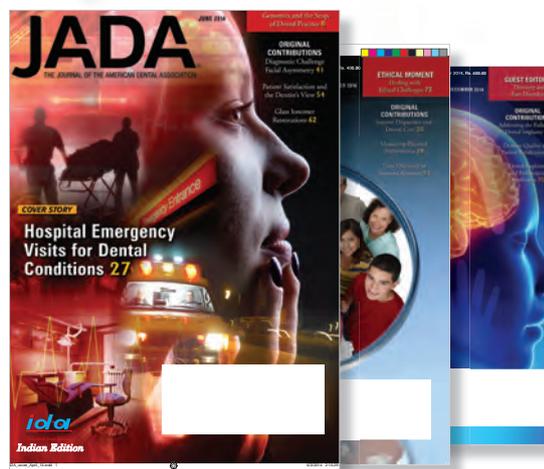

The publication covers a compendium of information needed for the aspiring young minds, desiring to make a mark in life, despite any obstacles that they may have to face. Greater involvement of students will certainly help improve the quality of the publication.

Dental Events

The publication 'Dental Events' signalled a new beginning in the provision of advance information on the various events of clinical importance to dentists being organized both within the country and abroad. It is a calendar of events of significance to the dentists that the dental fraternity can make use of to enhance their knowledge and skills.

It was started to focus on CDE activities and to highlight and promote dental education, World Dental Show, national and international conferences and career options. It has certainly helped the members to move forward in the fast changing world of dental science and to decide on the type of events beneficial for accreditation purposes.

Indian Edition of JADA

Members are aware that IDA has been bringing out an Indian edition of The Journal of American Dental Association, JADA, one of America's premier journals on dentistry and the world's best read dental journals. Unlike the monthly American edition, the peer reviewed scientific journal is published quarterly and offers a wide range of information relating to clinical practice, research, trends, perspectives, news covering the latest professional, socioeconomic and political developments facing dentistry. It also provides commentaries and letters expressing views on articles published in the Journal, besides highlighting comprehensive dental product information that is unbiased, scientifically sound, clinically relevant and user-friendly. Over the years JADA has changed with the times and the shifting needs of its readers, improving its appeal to its primary audience: dentists in clinical practice. Be that as it may, members would certainly agree that while, the publications cater to various segments of the dental fraternity, frankly speaking, their circulation statistics are not very encouraging and need to be improved to make them self-sufficient.

Indexing of Publications

To be recognized as an authoritative, high-quality source of information, a journal must be widely available.

Indexing facilitates the broadest dissemination of information by pointing researchers to articles that are relevant to the field. Once a journal is launched and has a track record of timely publication and solid content, it is appropriate to contact indexing and abstracting services for consideration.

Members are aware that Indexing of IDA publications is a matter that has been engaging our attention for some time now. Attempts made in this regard have led to indexing of the publications with a couple of agencies. However, further efforts are on for indexing of Clinical Dentistry and JIDA with PubMed and Medline agencies. PubMed includes links to many sites providing full text articles and other related resources.

IDA BUILDS YOUR BRAND IMAGE

IDA Website

A gateway to the world outside

Members would be happy to know that IDA website is an exercise in online management. Consistent with introduction of new activities and changes in web technology, appropriate changes in content, design and presentation have been made from time to time. It has now been thoroughly improved and expanded to cover a large number of specialities and subjects of great significance both to the dental profession and the community. It's an automated website with display of dynamic content. It's very interesting to know specifically how its content changes at any given moment. Provision of suitable links has been ensured to enable the avid and dentally discerned to gain an insight into IDA and its unique role in oral health promotion. The major features of the website include sections on IDA and its structure, membership, publications, IDA News, awards and scholarship details, photo and video library, placement information, guideline for authors for articles submission, public online, Emergency Dental Centre, and modules safeguarding oral health. Sections like Oral Cancer Foundation, TII and SPOT Centres, National Oral Health Programme, Child Dental Centre, etc., serve to signal IDA's commitment to the community. IDA can proudly claim the website to be unique and one of the best in the world of web firmament.

The valuable cooperation and support received and the sustained effort put in by the team of computer professionals in completing the tasks on time is greatly appreciated. With the revision and expansion of the website, a huge database has been created which calls for adequate arrangement for proper maintenance and updating of the site which is being ensured.

IDA and FDI 2014 Annual World Dental Congress

"Discovery consists not in seeking new lands but in seeing with new eyes"

A major activity of significance to the entire dental fraternity, in general, and IDA in particular, during the year under review has been the hosting of the FDI Annual World Dental Congress. The Congress was held from 11 – 14 September, 2014 at the India Expo Centre and Mart, Greater Noida. The Hon'ble President of India, Shri Pranab Mukherjee, who was the chief guest at the inaugural ceremony, started the proceedings by lighting the traditional lamp followed by invocation. Shri Ram Naik, Hon'ble Governor of Uttar Pradesh and Shri Ahmed Hasan, Hon'ble Health Minister of Uttar Pradesh, were the honoured guests at the opening ceremony.

The grand opening ceremony was attended, among others, by distinguished delegates representing 138 member nations, officials of central and state governments, dental luminaries of speciality associations, academicians, research scholars, students, leaders of dental industry from far and wide and corporate houses engaged in oral healthcare services.

Speaking on the occasion, the President said that new technologies have greatly improved diagnosis, treatment quality, patient comfort and provision of efficient dental care. The

consistent breakthroughs in the field of dental science have elevated oral care to newer heights and triggered the development of powerful and sophisticated tools that have enhanced the role of dentistry in healthcare management, he said. Oral diseases, the president said, are becoming the leading health problems these days owing to the rapidly changing lifestyles, sugary foods, wide-spread use of tobacco products and alcohol. Limiting the consumption of sugars, he said, could reduce public health problems like dental caries and obesity.

The President complimented IDA for its efforts on the oral healthcare front and urged the delegates to keep themselves abreast of global changes in dentistry to provide comfortable dental care to the community at affordable costs. He called for an oral health revolution to improve oral health across the globe. The President's address set the tone for the exciting and stimulating congress that followed.

Members would be happy to know that a large number of dentists, lab technicians, research personnel and academicians participated in the prestigious event. The combination of dental trade fair and scientific conference at the same time has proven

to be the ideal blend that has produced encouraging response from exhibitors and dentists alike. A good number of exhibitors totalling 220 companies presented new products and procedural techniques of significant importance to clinical practitioners in the 590 specially designed exhibition stalls aimed at enhancing their share in the expanding dental market in India. Many of the visitors to the Congress expressed interest in the technology behind the dental products displayed and how they differed from the conventional therapy.

Members would agree that holding of such international dental exhibitions enable the dental professionals to keep abreast of the global changes in technology and the dental trade and industry to contribute to faster development of dentistry in India besides making dental care quality-oriented and affordable. The Congress was the epitome of the latest technological advances in dental equipment, products and materials of great import to the clinical practitioners. The Congress, planned over four days of intense deliberations, knowledge exchange and display of dental wares, has been an outstanding exercise in organizational capability and meticulous planning.

Dr Mahesh Verma, IDA President and Chairman, Local Organizing Committee, while welcoming the Hon'ble President said that it was a rare honour for the Congress to have the gracious presence of the president of the country as the chief guest at the opening ceremony. It only showed the importance the government attaches to healthcare, particularly oral health. The Congress he said was truly global, as there were representatives from 138 member nations in attendance.

Dr Tin Chun Wong, FDI President, said that FDI was delighted to have selected India as the venue for the congress. India being one of the world's largest economies and the most populous countries was an ideal venue for FDI to pursue its vision of 'Leading the world to optimal oral health', she said. The FDI President made it known that the Congress participants would

benefit from the highly innovative and educative scientific programme covering over 25 important topics.

The FDI President thanked IDA for all the efforts made to create what she was sure will be a memorable FDI Annual World Dental Congress. Special thanks were also conveyed to Dr Ashok Dhoble, Hon Secretary General of IDA who, she was reliably informed, has been the focal point of all relations between the two organizations.

The Hon Secretary General of IDA and the Congress Organizing Secretary, Dr Ashok Dhoble, while profusely thanking the President for gracing the function affirmed that it would be the earnest endeavour of IDA to bring about an oral health revolution in the country to make oral healthcare services accessible and affordable. He also thanked both the IDA team and the FDI staff for cooperation, understanding and support for making the event possible with their tenacious efforts.

The event also witnessed the launch of (i) an oral health movement in the country to make the country 'Cavity Free', (ii) the project Happy Smile Healthy Smile to make teeth strong and to sustain the smile on the faces of people and (iii) celebrations to honour the father of Indian dentistry and founder of IDA, Dr Rafiuddin Ahmed, whose 125th birth anniversary would fall this year, i.e., 2015.

The contribution made by sponsors and several other agencies, including India Expo Centre and Mart, the cooperation and support extended by the government of India in the ministries of commerce, external affairs and home, was acknowledged and highly appreciated.

The dental exhibition provided an opportunity to the participants to witness the evolving state of the art dental equipment and products from across the globe. Showcasing of the state of the art dental equipment and products by the world renowned exhibitors such as Dentsply, Henry Schein, Ivoclar, Shofu, Sirona, and Straumann, to name only a few, provided visibility to the Congress. It was a mini global market in dental equipment, products and materials on view at the exhibition during the four days. Exhibitors from Asia, Europe, the Middle East, and the Americas numbering 220 displayed their products in the elaborately designed booths and helped clinical practitioners assimilate modern technologies and technical procedures for use in dental practice.

A feature of the dental exhibition was the special pavilions of the People's Republic of China, Germany, Israel, Taiwan, Turkey, the US, and the UK.

The cutting-edge scientific programme designed in tune with FDI's social responsibility of leading the world to optimal

oral health and themed "A million smiles welcome the world of dentistry" reflected the increasingly growing demand for dental healthcare today. The prime objective is to encourage and advance knowledge, study and practice of the science of dentistry in the current globalised environment and improve the quality of service rendered.

For an event of this global magnitude, the very best of dentistry, blending education with technology, was on offer. It essayed the latest international technologies and techniques via a powerful combination of cutting-edge scientific conference and international trade exhibition. The programme which addressed the major themes and concerns of dental practitioners of today covered more than 25 key concepts in dentistry, ranging from endodontics and preventive dentistry to practice management and the latest in imaging and digital dentistry. More than 30 international speakers and 70 Indian speakers shared their scholarship and opinions at this frontier of dentistry. The underlying focus of the Congress, through all four days, was on evidence-based dentistry. The importance of prevention of disease, and the initiatives taken to improve the oral health of the marginalised population received the much needed attention.

There were 120 scientific sessions with continuing education as the main focus for academic accreditation and value addition. These were addressed by renowned speakers of erudition and scholarship from contemporary dentistry and were qualified for academic credit points under the Accredited Continuing Dental Education Programme.

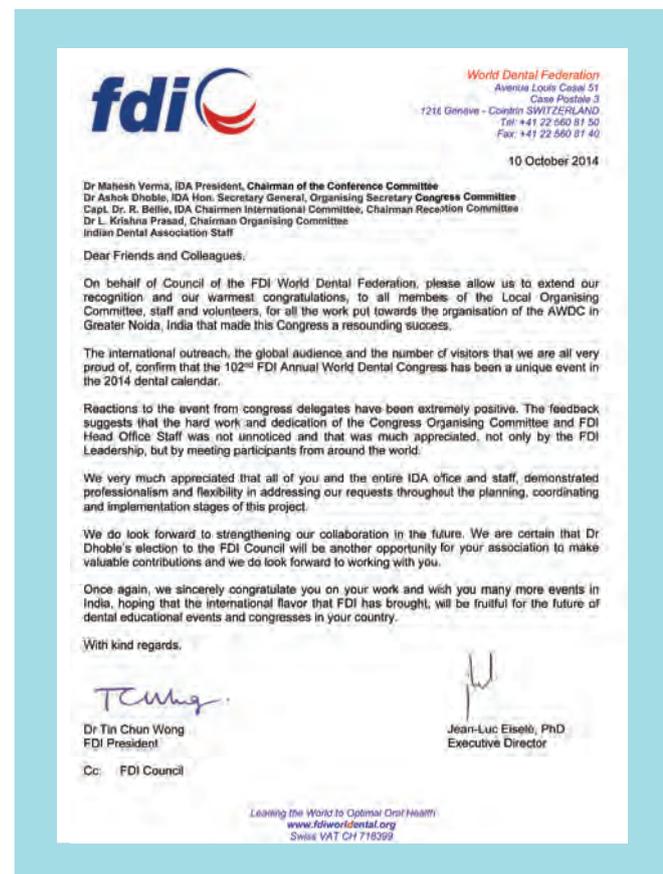

Members would be happy to know that E-posters, a novel concept which displayed multimedia versions of the poster, were introduced for the first time in FDI 2014. An advantage of e-posters is that details of the presentations can be enlarged to full screen for improved legibility. It gives an opportunity for a presenter to convey more effectively information that would not necessarily be possible with a printed poster. It helps maximize the impact of presentations. It enhances visualization to attract interest of attendees.

A programme titled "Udaan" presented students the opportunity to showcase their individual and unique talents helped them develop a prolific personality. The Congress provided

students an excellent platform for exhibition of their prowess in music, dance, debate and athletics. The spectacular sports extravaganza "Marathon" with fun and frolic unleashed the spirit of sportsmanship – a perfect blending of competition and companionship. From the feisty competitor to the easygoing sportsman, there was something for everyone to involve and enjoy.

Other attractions at the Congress included the social entertainment titled 'India Evening' at which glimpses of the rich Indian cultural heritage were presented to the delegates. Presentation of the cultural evolution from the vedic period to the modern times interspersed with Moghul and colonial rules added spice to the opening day. It was greatly appreciated by one and all making themselves merry to an evening of leisurely entertainment.

I am happy to say that all in all, the Congress was an outstanding exposition of IDA's inherent strength and organizing ability I acknowledge and appreciate the contribution of each member to the splendid success of the Congress. The FDI 2014 World Dental Congress that concluded in Greater Noida, New Delhi, was a huge success with an overwhelming attendance of over 20,000 national & international participants. We reproduce below the letter received from the FDI appreciating IDA's contribution for your information.

A Scientific Success- Blending Education with Innovation!

The cutting edge scientific programme at the FDI Congress themed “A billion smiles welcome the world of dentistry” was a grand show of blending technology with education.

The grand show over four days concluded with a record number of over 17,000 participants attending it and putting Indian Dentistry on the world map. It was an event par-excellence the like of which is seldom seen here.

The cornerstone of any conference is the scientific programme. It was no different in so far as FDI Congress was concerned. For an event of this global magnitude, the very best of dentistry was on offer. A cutting-edge scientific programme had been designed in tune with FDI's social responsibility of leading the world to optimal oral health and, as anticipated, the delegates were spoilt for choice with respect to the variety of knowledge available.

The scientific lecture programme covered more than 25 key concepts in dentistry, ranging from endodontics and preventive dentistry to practice management and the latest in imaging and digital dentistry. More than 30 international speakers and 70 Indian speakers shared their scholarship and opinions at this frontier of dentistry.

The highlight of Day 1 was Dr. Stanley Malamed's lecture on medical emergencies. Dr Stanley Malamed, who hardly needs introduction, is a global authority on local anaesthesia and medical emergencies. Medical emergencies are an integral, but

often ignored, part of dental practice. It was heartening to see the largest hall full to standing capacity so early in the day. It was a great opportunity for the students to meet and interact with their icon whose book they follow so religiously.

It was followed by the symposia on oral cancer, paediatric dentistry, caries prevention and management, etc. Public health from an Indian perspective described the existing oral health services in the public sector, and efforts made to improve the existing infrastructure.

Day 2 began on an interesting note with Financial Management by Dr. Alexander Tolmeijer, a discussion that needs to be incorporated in the dental curriculum. A Meet-the-Expert session with Dr. Stanley Malamed was inundated by a flood of registrations, so much so that it had to be shifted to a larger hall, where he addressed the latest advances in local anaesthetics. Workshops on Tobacco Intervention Initiative, Cleft Lip and Palate, and Forensic Odontology were also equally well attended.

The topics of medically complex patients, periodontal plastic surgery and regeneration, infection control, medico-legal aspects in dentistry and many more were covered on Day 3. A discussion on invisible aesthetics by Dr. Sunil Bhoolabhai was sought after by such a large number of delegates that it was repeated during the lunch break!

The last day, Day 4, had an assortment of interesting lectures, from oral-systemic connection by Dr. Michael Glick to functional smile design by Dr. Sandesh Mayekar. A practice management session was jointly conducted by Dr. Rajeev Chitguppi (Perionomics) and Dr. Sujit Pardeshi (Soft Skills) before a packed house. Sessions on dental trauma and CBCT imaging also received a well deserved attention. Orthodontics for non-orthodontists was a hot topic, conducted by Dr. Girish Karandikar. Management of complications in daily dental practice by Dr. Rajiv Borle was an eventful discussion.

Apart from the lectures by the invited speakers, there were others who took the first step by participating in Free Communications and Poster Presentations. Each participant was allotted 8 minutes for presentation followed by a 2 minute question-answer session.

A diverse variety of studies, surveys and literature reviews were presented by undergraduates, postgraduate students and also practising dentists. Around 10 different halls were allocated for the Free Communication, while Poster Presentation was given 8 cubicles. For many of the participants, this was the largest platform on which they could hope to showcase their work. E-posters made their entry at the Congress for the first time.

The underlying theme of the Congress, through all four days, was on evidence-based dentistry. The importance of prevention of disease, and the initiatives taken to improve the oral health of the marginalised population received the much needed attention. Platforms like FDI AWDC 2014 create a confluence of cultures, knowledge and science across the world. It constituted a meeting of minds unlike any seen in present day dentistry.

The New Launches from IDA

"Happy Muskaan Towards a Cavity Free India" launched

Members would be happy to know that the FDI Congress in September also witnessed IDA launching a first of its kind oral health movement in the country in the presence of the Hon'ble President of India. Titled **"Happy Muskaan – Towards a Cavity Free India"**, it's a joint initiative of IDA and Colgate in the discharge of their social responsibility. It's a movement that would lead the country to a specially designed volunteer based programme with the objective of educating, encouraging and engaging citizens to practise basic oral hygiene in their daily life to attain the goal of a 'cavity free' country. The movement, which is in sync with the "Oral Health for All by 2020", an ambitious target set by the government of India, is akin to the avowed goal of 'optimum oral health for all' pursued by IDA.

The primary objective of **'Happy Muskaan'** is to create a Cavity Free Future for India with the first leg of its journey beginning with "Oral Health Month 2014" – an awareness drive being implemented across the country.

Dr. Strong Teeth, the Mascot, launched at FDI 2014

I am happy to inform you all that IDA also launched its first ever mascot named Dr. Strong Teeth under the banner of its National Oral Health Programme (NOHP) at the premier event. It is an initiative taken by IDA to create awareness about optimal oral health, combining preventive measures with accent on educating the children of India about maintenance of proper oral hygiene. Dr. Strong Teeth advocates brushing twice a day and paying regular dental visits for prevention from oral diseases. The use of the mascot.

It is a programme that combines preventive measures with accent on education to create oral health awareness among the various segments of the population.

Compendium of Indian Contribution to Dental Scientific Literature

As a mark of tribute to the much revered founder of Indian dentistry, Dr Rafiuddin Ahmed, whose 125th birth anniversary the dental fraternity will be commemorating shortly, **"A Compendium of Indian Contribution to Dental Scientific Literature"** prepared by Dr Abhay Kolte and published by Indian Dental Association was released during the opening ceremony of the FDI Congress 2014. It's a concise compilation of published research work carried out by the dental professionals in India arranged in broad subject categories. The idea is to create a database of noteworthy contributions to dentistry by Indian dental professionals and their relevance to therapy management. The objective of this database is to make it simple so as to find out research relevant to improving health and not to create an exhaustive analysis, but an accessible summary of key published evidence relating to health and practice management. The various ongoing research programmes do not fall under the scope of this publication. The translational outcome of the research done is the key to the clinical benefits to the patients.

I am happy to announce that a first day Postage Stamp and Postal Cover were released by the governor of Uttar Pradesh and handed over to the Hon'ble President of India. The Post-Master General of Uttar Pradesh was present on the occasion.

IDA and Development of Database of Dental Professionals

Members would recall that IDA had developed software with all the features essential for online management of dental personnel resources in the country. At a Workshop organized a year ago the Government of India in the Ministry of Health and Family Welfare and the Dental Council of India had appreciated and accepted the module for implementation by the State Dental Councils. While the system will help the Ministry monitor the utilisation of dental healthcare personnel and accordingly design a comprehensive oral health policy, the Dental Council of India and its affiliates at the States on their part will be able to suitably plan management of resources to avoid any skewed distribution and make effective and efficient use of dental health personnel to provide better oral care.

So far, seven State Dental Councils, i.e., Maharashtra, Gujarat, Himachal Pradesh, Chandigarh, Madhya Pradesh, Haryana and Kerala have launched their websites with the assistance of your Association. Bihar State Dental Council is another whose request is being processed.

Extend timely relief in dental emergencies

Become a Member of **EDC**
Provide immediate relief in dental emergencies to the people in need !
Get listed in IDA's EDC directory so patients can quickly locate and contact you in dental emergencies.

Stand out and be recognised as a Dentist who cares.

IDA and Oral Health Development Initiatives

"Dentistry is not expensive, neglect is; Smile, it lets your teeth breathe"

Members would not disagree with me that the dental healthcare service providers have a definite role to play in contributing to the national cause of improving oral health and hygiene in the country and thus improve general health of the people. In this connection, the various health initiatives undertaken to improve the oral and systemic health of the people such as National Oral Health Programme, Oral Cancer Foundation, National Oral Cancer Registry, Tobacco Intervention Initiative, Child Dental Centre, Emergency Dental Centre, the IDA Health Centre, to name only a few, assume considerable significance for oral healthcare management.

National Oral Health Programme

Members are well aware that, as custodian of oral health in the country, IDA has been greatly concerned about the obvious constraints in accessing oral care by the various segments of the population. To remedy the situation, a National Oral Health Programme has been initiated. It aims at improving access to oral healthcare and reducing disparities thereby contributing to the attainment of optimal oral health for all. It affirms that oral health is integral to general health and well-being.

The programme takes care of three segments of the population, viz., children, the family and the corporate personnel. To hasten the process, unique identification cards, i.e., the Child Oral

Health Card, the Family Oral Health Card and the Corporate Oral Health Card offering many oral health benefits to these categories of people, have been devised and designed which bestow a passport to sustaining oral health for a lifetime. National Oral Health Programme is a move towards building a stronger, effective and efficient oral healthcare system contributing to the health and wellbeing of everyone in the country. Cards offering many oral health benefits to children (Child Oral Health Card); adult (Family Oral Health Card), the elderly (Platinum Oral Health Card) the disabled (Special Privileged Oral Health Card) and the corporate staff (National Oral Health Card) have been designed under the National Oral Health Programme umbrella.

Members may be happy to know that during the year under reference numerous dental check up camps were organized to take care of oral health needs of children, adults, the elderly and the disabled, not to speak of the employees of the corporate sector. We are grateful to the authorities associated with these institutions for their cooperation and support in enabling IDA to offer oral care services to the community as a part of its social responsibility.

Dental Check-Up under National Oral Health Programme

During the year under review, activities such as free dental check-ups, community-based oral health camps and talks to generate oral health awareness were held as part of the agenda of activities under the programme. The dental check-up camps were as under:

For the Elderly

IDA organized a free dental check up camp for the senior citizen members of the Param Shantidham Vrudhashram in Taloja in Navi Mumbai as a part of IDA's National Oral Health Programme. A good number of 150 elderly persons availed of free dental check-up and were advised appropriate treatment. They were given Platinum Oral Health Card and passwords to enable them to view their reports online. The card will enable them to avail of necessary oral healthcare services taking advantage of 10 percent discount at the IDA certified dental clinics. Five patients were also given dentures free of charge.

For School Children

Schools are important institutions that facilitate provision of preventive oral and general healthcare programmes. The availability of children in large numbers in schools permits delivery of mass educative programmes in a convenient manner. A large number of children and parents have limited knowledge of the causes and prevention of the most common oral diseases. Similarly, the schoolteachers' oral health knowledge has also not been satisfactory.

School teachers can effectively influence student's knowledge, attitude and practices regarding oral health and can bring change in behaviour. It is very important to impart oral health education to the children since the lifestyle and hygiene practices once established at an early age can go a long way in spending rest of the life in a healthy way. The new programme heralds a novel approach in oral health education of children and school teachers.

Activities such as free dental check-ups, distribution of samples of toothpaste and toothbrushes as well as educational leaflets and posters and large-scale community-based oral health camps are a part of the agenda of activities. During the year under review 16 free dental check-ups were held in as many as 12 schools from South Mumbai to Andheri in Mumbai covering 13000 students. Following dental check up, the children were given treatment plans for further treatment, wherever necessary. Needless to say, all these children are proud owners of child oral health card.

For Corporate Staff

Members would be happy to know that during the current year, under this pioneering activity of NOHP, oral health check up of employees of four establishments was carried out in four locations – Bangalore, Gurgaon, Hyderabad and Mumbai. In all 159 patients underwent oral health check up from these locations. Employees who had oral problems availed of the services provided and were advised of the importance of regular dental visits for oral care.

These oral health examinations were preceded by lectures by dental professionals to make the employees become familiar with the importance of maintaining oral health and hygiene. In essence, these are expected to produce multiplier effects in

their own families and neighbourhood, besides providing a boost to the professional practice of members. Corporate staff that undergo dental checkups are provided "Corporate Oral Health Card" containing the logos of IDA and the corporate house concerned. They were given the password to facilitate viewing the report online and the National Oral Health Card that will facilitate them to gain 10% discount on further treatment.

We appreciate the interest evinced by members to participate in this programme which, we have reasons to believe, would go a long way in bringing about perceptible changes in the oral health scenario in the country.

Corporate employees, who want to avail of dental services provided under the scheme, can click on the Dentists' Directory created to identify and locate a dentist participating in the programme and take an appointment online or on phone to visit the clinic later for treatment. Use of the card entails the person a 15% discount for dental treatments carried out.

Special Privilege Dental Check Up

It may interest you to know that a special privilege dental check up camp was organized for mentally retarded, physically disabled as also for the blind during the year. The 6 camps conducted for the purpose covered 535 patients in Mumbai at four locations.

Community Dental Check Up

Members may be happy to know that under the NOHP banner, quite a few community camps numbering nine were held during the year in different locations covering 1930 patients.

Rural Dental Check Up

In our thrust to the rural areas, IDA was able to organize only four dental check up camps in the rural areas covering 450 patients. The activities under NOHP had a low coverage this year owing to the staff being busy with FDI Congress. We hope to pick up momentum in the years ahead.

Oral Cancer Foundation

The global incidence of oral cancer has been rising, more so in India. Mortality from the disease remains high and survival has not improved in the last 30 years. According to a World Health Organization

survey report, India ranks first in the world in oral cancer. As custodian of oral health in the country, IDA had been very much concerned about addressing the disease and its major causative factor, i.e., tobacco habit, to improve the oral health environment.

Members might recall that the establishment of the Oral Cancer

Foundation for early detection and treatment was aimed at creating an 'oral cancer free' nation. Facilities are being created for early detection and treatment to aid prevention and reduce mortality, besides educating the masses of the risk factors.

Members are aware that an Oral Cancer Registry to exclusively register the number of oral cancer cases in the country has been set up for compilation and assimilation of research data on oral cancer as well as to facilitate conduct of oral cancer research in the country. These together marked the beginning of a new era in safeguarding the oral health of people through early detection and treatment.

SPOT Centres

Members are aware that Spot, Prevent Oral-cancer Trauma (SPOT) Centre is IDA's initiative under the aegis of Oral Cancer Foundation (OCF) for early detection of oral malignancy and potentially malignant lesions. SPOT Centres constitute a significant tool at reducing the incidence of oral cancer through early detection and treatment. The SPOT Centres also facilitate research by providing patient data.

Members would be happy to know that a small beginning has been made in the setting up of SPOT Centres. There are currently 62 such Centres in operation in 19 States and 2 Union Territories across the country.

IDA is keen on creation of a band of trained dental healthcare providers to man clinics certified as SPOT Centres for early detection and treatment. The idea is to establish more and more SPOT Centres across the country to make detection of precancerous lesions and counselling for prevention accessible to a larger number of persons.

A minimally expensive, formal one day training is imparted to all those dental/healthcare professionals desirous of starting a SPOT Centre to create a class of professionals providing effective oral cancer service and education. The training equips them with the technique of carrying out detection of oral cancer lesion and the subsequent biopsy to strengthen their oral cancer prevention and detection service. Three training camps were organized one each in February, July and December during the year in which a total of 110 dentists participated.

The SPOT Centres have the necessary facilities required for

detection of oral cancer, besides trained dentists specialised in oral cancer examinations, and to identify patients who use tobacco and alcohol and counsel them about their risk for cancers. The SPOT Centres thus combine both the tobacco cessation service and oral cancer detection. Setting up of SPOT Centres provides an opportunity to not only earn credibility but also involve the healthcare providers in the battle against oral cancer and tobacco cessation as a service to the nation.

IDA would welcome dental professionals to be a part of its noble initiative by registering themselves for the initial training in early detection and treatment and to get their clinics certified as SPOT Centres. The idea is to make detection of precancerous lesions and counselling for prevention accessible to a larger number of persons by establishing SPOT Centres across the country.

Tobacco Intervention Initiative

As reported earlier, the Tobacco Intervention Initiative (TII) Centres, as effective tools for oral healthcare management, are being set up in various states by dentists trained in behavioural counselling, medication and nicotine replacement therapy. Members would be happy to know that so far nearly 756 TII Centres

have become functional in various states and union territories. The setting up of TII Training Centres by IDA by utilising the services of trained personnel to impart training to dentists in their own respective states has paid rich dividends going by the growing number of TII Centres in the country.

During the year under review, as many as 64 participants have been trained and there are 46 pending registrations for training which are being speeded up. We are hopeful of covering over 1000 Centres shortly.

Establishment of TII and SPOT Centres brings to the members the wonderful opportunity of providing enhanced services to your patients and to broaden your reach to the community. In fact, these Centres give you a platform, not just to gain knowledge, but also to get specialized training in oral cancer detection and tobacco de-addiction from the best in the field by registering your clinic as SPOT and TII Centres for oral cancer detection, behavioural counselling and nicotine replacement therapy. The interest and enthusiasm displayed by members in being a participant in this national cause deserve appreciation.

Child Dental Centre

Members would be happy to know that the Child Development Centres being set up have been showing encouraging response. There are over 67 Child Development Centres set up so far covering 20 states and one Union

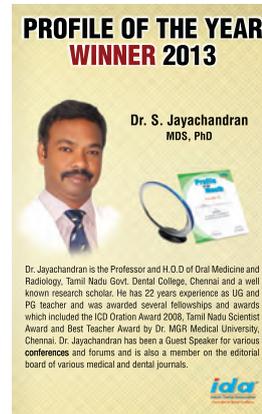

Territory in the country since its launch. Though slow, the CDCs are gradually picking up momentum and vigorous marketing would ensure greater spread of CDCs across the country.

Members would agree with me that CDCs assume considerable importance particularly in the context of the new launch of "Cavity Free Future" at FDI Congress 2014. Maharashtra state leads the list with 18 centres followed by Uttar Pradesh with 6. The next best performers are Gujarat with 5, while Bihar and Kerala have 4 each.

Dental Practice Accreditation

Members are aware that IDA intends to usher in a new era in dental practice at par with international standards. The broad objective of dental practice accreditation is to standardise and improve the practice of dentistry in the country. It provides benchmarks for excellence to render high quality of care. It's IDA's endeavour to represent and better serve its fellow dentists by certifying their clinics accredited if their clinics fulfil the norms and quality standards of oral healthcare. Efforts are on in this regard and we hope to launch the project in the coming year. With dental practice accreditation IDA hopes to provide a standardised dental healthcare system ensuring delivery of superior, current and internationally accepted treatment modalities while at the same time safeguarding the rights of both patients and dentists.

Members' Profile

Members would be happy to know that your association has instituted an award for achievements in dental excellence. It's an award conferred on a member in recognition of his services to the community, in particular, and the profession, in general.

A web platform for members to meet and know each other and recognize the potential of others, their achievements and personal status has been developed. Categorized as 'Profile of the Month' the choice of the winner is made purely on an objective assessment of the comprehensive information submitted via the curriculum vitae of members uploaded every month during a specific period. Selection of the CV for online voting by members is based on academic excellence and the nature of services rendered. The member who gets the maximum number of votes is declared winner and given the 'Profile of the Month' award. Winners of the monthly award qualify for the 'Profile of the year' award from amongst whom the member who secures maximum votes is confirmed the 'Profile of the Year' winner. I am happy to say that the response has been quite encouraging.

The winning 'Profile of the Year' 2013 was Dr S Jayachandran, a Professor and Head, Department of Oral Medicine and Radiology, Tamil Nadu Government Dental College, Chennai. Dr Jayaraman who has a doctorate degree is a well-known research scholar and a Ph D guide as well.

Professional Indemnity Insurance Cover

Members are aware that IDA has recently conceived of a scheme to provide comprehensive insurance benefits to members whilst rendering professional service. The scheme has been promoted in association with National Insurance Company Limited, a government of India undertaking, and Secure Insurance Services. Known as the Professional Indemnity Insurance Scheme, it provides insurance cover against legal liability to pay damages arising out of negligence in the performance of professional duties. It is an exclusive insurance cover that provides for IDA members a wide range of insurance benefits against legal liability arising from errors and omissions while rendering professional services.

It may not be out of place to mention here that the premiums paid under the scheme are 50 percent lower than what otherwise would have been paid if such insurance cover is obtained from other agencies. By offering this indemnity insurance cover, IDA wants to ensure that its members received professional indemnity. The response from members has been very encouraging.

Patient Education Brochures

Members might recall that IDA has been pioneering a strategy of prevention and creating awareness about oral diseases by advocating measures to prevent them through maintenance of oral health and hygiene. Improvement in the quality of oral care delivered has also been a matter that has been engaging our attention. Driven by the desire to attain its goal of optimal

oral health in the country, IDA has been bringing out various oral healthcare brochures aimed at educating the patients to eventually bring about behavioural changes in them to facilitate pursuance of better oral health and hygiene.

Presently there are 32 oral health patient education brochures on various topics together with instruction cards each priced at a concessionary rate of Rs. 3 to members. Additionally, a set of 4 posters, personalised products of various types and acrylic stands for display of posters at the clinic are also available.

These oral health brochures highlight, in simple language, the various oral health diseases, their causes, symptoms, the risk factors, the need for care, the various treatment procedures, preventive mechanisms and oral hygiene principles to be adopted. They contain information presented in a lucid manner which helps improve patient comprehension, enable them make informed decisions about their own dental healthcare and facilitate oral health promotion by improving communication between dental healthcare service providers and the patients. They provide the complete solution for patient education at the point of care. Minimally priced, the brochures can be utilised by the patients, dental clinics, hospitals, community health centres, polyclinics, and health insurance management. These oral health brochures can be effectively utilized not only by the patients, but by students, academicians and even those dentally discerned.

I am very happy to inform you that the response to these brochures has been extremely overwhelming and, in the wake of growing interest for them, effective measures are being taken to comply with increasing demands. Members would agree that the patient education brochures would go a long way in enhancing the clinical practice of members as also developing communication channels and longstanding bond of trust between the patients and the dental healthcare service providers.

Continuing Education Programme

"The Solitary Solution to Professional Advancement"

Dental education calls for frequent review in order to most appropriately address community needs consistent with the rapidly changing technology. To meet this ever growing needs of dental professionals, IDA has been assembling some of the best minds in contemporary dentistry, tracking latest advancements and most innovative techniques to aid clinical practice. Continuing education provides updates on new knowledge, besides new knowledge in specific areas; introduction to new skills and techniques; solutions to problems in dental care and alterations in delivery of healthcare to enhance the quality of oral care service to the community.

Accredited Continuing Dental Education Programmes

Globalisation of dental science has made it essential for every practising and teaching dental professional to look around and understand the technological changes happening around them to widen their knowledge and update their clinical skills. Towards this end, IDA has been planning, conceiving, organizing as well as conducting Accredited Continuing Dental Education Programmes (ACDEP) aimed at encouraging and assisting the dental professionals to achieve higher levels of skills and knowledge to continually provide an improved level of care. Besides earning credit points, which are significant value-additions to the basic qualification, it helps professional advancement as well.

A series of CDE programmes, Webinars were organized during the year to keep dental practitioners abreast of the latest technological changes in dental science. Highlights of some of these are, as under:

Crown Club - M/s Reddy's Laboratory

Geographical spread of the country demands exploring newer ways to serve the community. Hence, in association with M/s Reddy's Laboratory, a distance learning programme in three modules, titled 'Crown Club' was carried out. The content development and logistic arrangements were taken care of by M/s Bioquest Solutions Pvt. Ltd. Under the programme, eminent faculties' lectures were recorded on DVD and the DVD was prepared in sync with the respective presentations, which were later circulated to professionals along with selective articles written by the respective faculties. An IT platform was deployed to access the benefit of the activity. Members would be happy to know that the participants were happy to gain knowledge at their own convenience. Three thousand professionals were benefited through the programme.

Specialist Study Circle

IDA in collaboration with M/s Abbott Healthcare Pvt. Ltd (Multitherapy Division) carried out a distance learning programme titled 'Specialist Study Circle'. The programme was run in four modules and each module kit consisted of articles sourced from international journals, course kit and video recorded DVD. The education kit development was taken care of by M/s Jaypee Brothers Pvt. Ltd. Four thousand professionals were the beneficiaries of this activity.

Webinar Series:

Members would agree that every day is a learners' day and nothing could be better if learning is at the learner's convenience. Towards this end, IDA has equipped itself to meet with the evolving technologies to remain in the forefront and place its newly developed resources to use in our efforts at moving ahead on the path towards achieving our goals.

IDA Webinar Series

Members would be happy to know that IDA with support from PEPSODENT organised a series of 6 webinars on various topics. All webinars in the series were webcast from IDA HO in Mumbai and hosted on IDA's own platform.

Dental Excellence Programme

IDA with logistic support from M/s Abbott Healthcare Pvt. Ltd., (Pain Management Division) organised a yearlong webinar series on various topics involving national and international faculties. The logistic support was provided by M/s Medic Press Ltd. The interactive platform was at hand to facilitate interactions amongst participants and faculties in real time, even though they were physically present in two different continents. The programme was well received by the participants and over 4000 plus professionals participated in the webinars.

Educational Training Centres

Educational Training Centres (ETCs) are the conduit for the conduct of Continuing Dental Education Programmes (CDEs). The programmes involve lectures, practical demonstrations, hands-on courses and group discussions. CDEs reflecting the latest technological innovations and technical procedures help promote career advancement and enhance the image of the clinical practitioners. ETCs facilitate conduct of continuing education programmes with emphasis on teaching clinical techniques and skills necessary to enable members to remain proficient in their own chosen fields. ETCs have been specially designed to allow intensive hands-on and clinically based dental education programmes offered round the year at affordable fees. Even those practising in the rural and remote areas of the country are able to avail of these programmes.

IDA Community Programmes

"The best way to find yourself is to lose yourself in the service of others"

Emergency Dental Centres

Members are aware that IDA had taken the initiative of launching a 24-hour service to provide reliable dental care to the people as and when they need. Emergency Dental Care (EDC) a novel concept at offering steady, reliable and uninterrupted dental service throughout the week has had encouraging response. Members would certainly agree that such a service undoubtedly goes a long way in providing successful dental practice every dentist yearns for and in improving dental care and the oral health scenario in the country. With right ambience, tools and equipment, coupled with dedicated and responsive staff, EDCs would facilitate in offering high quality service to the patients.

Members would be happy to know that there are at present as many as 310 Emergency Dental Centres in operation in various states across the country. Maharashtra (87), Tamil Nadu (29) and Gujarat (28) lead the states in setting up EDCs. Members from the North Eastern States, barring Assam, are conspicuous by their absence. Going by the good number of enquiries being received by your Association the potential for expansion is good. Dental professionals who participate in this innovative social scheme will be given a monogram which they can stick at their clinic as a mark of certification by IDA. EDCs are listed in the area-wise search list wherein patients in need of such care can easily locate them in their nearest areas for any emergency dental care.

World Oral Health Day

World Oral Health Day (WOHD) is now celebrated every year on 20 March instead of September 12. It's a day to highlight the benefits of a healthy mouth. It promotes worldwide awareness of issues around oral health and the importance to everyone, old and young, of looking after oral hygiene. "Celebrating

healthy smiles" was the chosen theme of World Oral Health Day 2014. The aim of such a commemorative day is to provide an occasion for conducting global, regional and national activities related to oral health. Several branches observed the Day by holding public dental check-up camps, educating people and generating awareness about oral health and hygiene, including proper brushing technique and the importance of oral health and hygiene to emphasise the importance of oral health for general health.

World No Tobacco Day

'World No Tobacco Day' is a global initiative designed to raise awareness of the harmful health effects of tobacco use and to induce people to eschew tobacco products to live a healthier life. The 'World No Tobacco Day' is being observed all over the world on 31 May every year. The Day is intended to encourage a 24-hour period of abstinence from all forms of tobacco consumption across the globe. It's an annual awareness day sponsored by the World

Health Organization (WHO) since 1987 to highlight the health risks associated with tobacco use and advocate for effective policies to reduce smoking and other forms of tobacco use. Every year a theme is selected to give greater focus to a more unified global message for the Day and to draw attention of the people to the health problems that tobacco use can cause. This year's theme was "raise taxes on tobacco". IDA has been observing the day with enthusiasm by organizing various activities aimed at awareness creation.

DENTIST'S DAY CELEBRATIONS

Dentist's Day is celebrated on 6 March every year. One of the objectives behind celebrating the Day is to create greater awareness about oral and dental health and their obvious links with general health. It's an occasion to exhort the dental fraternity to rededicate itself to the cause of IDA's goal of attainment of optimal oral health for all in the country.

To mark the occasion, IDA organised a series of continuing dental education (CDE) programmes to keep the members updated on the global changes in dental science, organized workshops and seminars to inform the members about the various developmental programmes aimed at improving dental health of the people. It's a special day set aside to show some appreciation towards dentists and everything they do.

National Oral Health Programme

National Oral Health Programme, an initiative of the IDA, affirms that oral health is essential to general health and well-being.

For details write to: nohp@ida.org.in or visit www.nohp.org.in

JOBS

IDA Employment Bureau

IDA aims at professional advancement of members and the Employment Bureau is a means to this end.

Employment Bureau facilitates students or members find new placements.

Members can also put in their requirement for openings on the website.

IDA would be delighted to help you in your job search.

For details write to: employmentbureau@ida.org.in

IDA and Corporate Partnerships

"Cementing and Strengthening Social Responsibilities"

Members are aware that IDA has been receiving considerable support and cooperation from quite a few corporate bodies in the implementation of programmes aimed at increasing oral health awareness. For better outreach and larger benefit to the targeted population IDA has built up, over the years, a strong and enduring relationship with a few agencies. These partnerships have been of immense value in achieving the goals of optimal oral healthcare and hygiene. The contribution of the corporate partners in IDA's efforts in oral healthcare is commendable indeed and needs to be duly appreciated and acknowledged. IDA looks forward to their continued patronage and support in its future endeavours as well.

Colgate, Hindustan Unilever, GSK Healthcare, Johnson and Johnson, to name only a few, have been actively and continuously supportive of the efforts of IDA in this regard. IDA believes in creating and strengthening lifelong partnership through their involvement in a wide spectrum of academic, scientific, cultural and community activities designed to promote oral health awareness and practice of oral hygiene among the people. This commitment to the social cause has reinforced and cemented our association. Colgate, among others, is one of the major sponsors of almost all dental conventions, seminars, conferences and specialised workshops organized by IDA.

IDA-COLGATE

'Bright Smiles Bright Futures Programme'

Dental caries is the most common oral disease among children leading to tooth decay, causing pain, absence from school, and loss of confidence. Sadly, many children do not have access to basic dental care and the education needed to maintain good oral health. IDA-Colgate 'Bright Smiles Bright Futures Programme' (BSBF) is a massive national oral health education initiative that addresses this need by stressing on the importance of preventive oral care amongst school children. It's aimed at

inculcating preventive self-care habits among children from an early age as a part of oral health care. It may not be out of place to mention that IDA-Colgate partnership now into its 40th year has been singularly responsible for improving oral health awareness and oral hygiene practices among children, in particular, and public at large.

Under this programme, children in primary schools receive instructions in dental care from members of the dental profession nominated by the Indian Dental Association. Oral health education is imparted with the aid of audio-visuals and printed literature. Free dental health care packs, including samples, are also distributed to encourage good oral hygiene. Some of the components of BSBF programme include (a) school dental health education with the aid of charts and audio visuals (b) teachers training to impart oral health and hygiene in children and (c) demonstration of correct brushing techniques.

This special School Contact Programme reaches out to primary school children in disseminating the message of basic oral care and hygiene to maximize the impact. Over 100 IDA branches spread over 23 states in the country volunteered the time and skills of their dentists to educate school children about the basics of oral hygiene such as proper brushing techniques and good dietary habits. This unique annual programme covered 2 million school children between 6 and 12 years of age across 5000 schools in the country. To sustain the message, special Teachers' Training and Parent's Orientation Programmes are being organized. Colgate provided logistic support including teaching aids and education materials as well as special dental health kits. Through partnerships with governments, dental professionals, schools and community groups, BSBF programme increases oral health awareness and promotes good oral care habits. A lifetime of healthy habits, growing self-esteem, a foundation for success – that's what the power of a Bright Smile is.

IDA COLGATE 'Oral Health Month' PROGRAMME

Members are aware that, on a privileged association with Colgate, IDA has been observing the Oral Health Month every year for the past over eleven years. Oral Health Month, a remarkable annual

mass contact programme, conceived and initiated jointly by IDA and Colgate, is a unique, large scale nationwide awareness drive. Spanning two months – October and November - the two-month long awareness drive was aimed at creating a “Cavity Free Future”. In essence, the programme this year was focused on educating people across the country about the importance of oral care leading to the goal of zero cavities. On its eleventh year, it got off to a splendid start on October 1 and concluded on 31 November this year. The oral care initiative aims to create nationwide oral health awareness to combat cavities and instil the importance of good oral hygiene through free dental check-ups to dawn a ‘cavity-free’ era in the future.

The focus is on awareness generation and educating people about the need for good oral care and hygiene as also to make the dental facilities available to everyone. The oral health awareness related initiative was to highlight the importance of oral health, in particular, and overall health, in general. Over 35000 IDA dentists participated in the two month long awareness drive to combat cavities and instil the importance of good oral hygiene. Driving the campaign were the free public in-clinic dental check-ups in over 1300 cities and 45 towns covering schools, housing societies and under-privileged areas offering free cavity check-ups. Use of mobile dental vans reaching out to cover the underprivileged areas to offer free dental check-ups was a feature of the programme.

The outreach events of Oral Health Month 2014 included free public dental check-ups in city clinics and also camps at other centres. The Oral Health Month 2014 programme was aimed at conducting dental checkups for people, college and school students, housewives and traders across various locations. Information on the right way of brushing and timely dental checkups was also disseminated. A notable feature of the programme was the participation of celebrities from the film world, viz., Kareena Kapoor Khan, Sonam Kapoor, Allu Arjun and Kajal Aggarwal who were involved in taking the ‘Cavity Free Future’ pledge to encourage families to benefit from the free dental check-up provided during OHM and adopt good oral hygiene for a ‘Cavity Free Future’.

Oral Health Month 2014 was supported by a fully integrated 360 degree marketing campaign encompassing TV, digital and on-ground activities to increasingly encourage families to take the pledge for a ‘cavity-free future’. OHM campaign reached out to consumers through kiosks put up in modern retail environments through tie ups with 4 retail chains. As members are aware, one of the important components of Oral Health Month 2014 public dental check up activity was the use of Mobile Vans to carry

out dental checkups and to have better rural outreach. The mobile vans equipped with the necessary logistics were in use in 45 cities and towns across the country carrying out 351310 checkups. Through this initiative it reached out to the masses that have limited access to dental care and need to be taught the importance of good oral hygiene.

Central to the Oral Health Month is the accent on awareness generation about the need for good oral care and hygiene. The Programme extended its coverage from September through October for greater accessibility and availability of the dental check up facilities to everyone over a longer period. The intensive two month-long oral health awareness campaign became a leading campaign for establishing and promoting improved oral health habits in India. IDA is grateful to Colgate for the manner in which the whole Programme was organized and to our members for extending support for the conduct of free dental check-ups.

IDA Colgate Future Dental Professionals Programme

Providing help at hand to budding dentists by keeping them informed of various options available for them so that they can take informed decisions in shaping up individual careers was the underlying principle in the programme. In the series, seven programmes were organised at Pune, Indore, Lucknow, Ghaziabad, Hyderabad, Chennai and Nagpur.

IDA-Colgate Online CDE Programme

Colgate actively and closely supports the efforts of IDA to continuously update the knowledge and skills of its members through various forums. Colgate today has been the major sponsor of almost all Dental Conventions, Seminars, Conferences and specialised workshops organized by IDA. The IDA-Colgate Continuing Dental Education Programmes are organised regularly all over the country as a part of IDA's commitment to dental excellence. Primarily, these CDE programmes are aimed at exposing the practising dental professionals to the latest in dental technologies and technical procedures to aid their therapies. Both IDA and Colgate have a common objective of improving the oral health of the nation. Its great practical significance lies in contributing to improving the oral health conditions in the country. By keeping its members abreast of the latest practices in dentistry, IDA is discharging its social obligation of improving the quality of service rendered to the community. During the year under review, the IDA-Colgate combine organized till November 2014, a total number of 545 CDE programmes involving 165 branches. IDA appreciates the support extended by Colgate and hopes to carry forward this association to other areas of interest as well.

IDA Annual Conference

"An Exercise in stimulating newer thought processes"

68th Indian Dental Conference

The 68th Indian Dental Conference that brings together members of the Indian Dental Association, will be hosted this time by the Karnataka State Branch from February 13 to 15, 2015 at Monhpo Convention Centre in Bengaluru. The conference features continuing education via the cutting-edge scientific programme, trade exhibition, networking and social events – inseparable components of all conferences. The conference brings together

68th Indian Dental Conference Bengaluru

members of IDA, dental industry leaders, lab technicians and dental faculty to promote scientific interaction on a defined theme of importance. The conference has the theme "**Connect today2 transform tomorrow**". The 'Scientific Programme' will reflect IDA's commitment to improving oral health. One of the unique features of the IDC is the debates that are slated to be held on issues relating to science, technology and dental practice. The prestigious event will provide the ideal setting to bring together renowned dental practitioners and surgeons from all over India and abroad. The prime objective is to encourage and advance the knowledge, study and practice of dentistry in the current globalised environment.

67th Indian Dental Conference

The 67th Indian Dental Conference, the prestigious annual event of the Indian Dental Association, was held in the historic city of Hyderabad at the grandiose HITEX Exhibition Centre from 21-23 February. A large number of distinguished personalities

and prominent dental professionals, including several renowned guest speakers and IDA representatives from branches across the country participated. The Conference was inaugurated by the former Special Secretary to the Chief Minister of Andhra Pradesh, Shri K. Prabhakar Reddy.

The glittering inaugural function was far ahead of its time in terms of planning, execution and the eventual outcome. The conference was hosted by the Andhra Pradesh State Branch of IDA, one of the very active branches in the country.

The event was truly an epic extravaganza of international proportions attended by a large number of delegates. It, indeed, was a model event in the history of IDA. The impressive infrastructure and the majestic ambience provided the ideal setting for such intellectual interaction. The conference included pre-conference courses, scientific sessions, orations lectures, symposia, cultural programmes and a mega dental trade exhibition. It was an excellent exercise in stimulating newer thought

processes and offering new solutions by specialists in different fields who focused on the emerging issues in oral healthcare in the country. The event, reflecting a spirit of excellence in dentistry, was, perhaps, India's single largest gathering of dental professionals and key representatives of allied industries.

The conference with the exciting theme "...together towards dental excellence" got off to a splendid start with the Pre-Conference Courses on 20 February. These courses kept in mind the various aspects of dentistry, the latest global trends as also the needs and requirements of the delegates. There were 8 Preconference Courses that set the tone for the scientific deliberations that were to follow. They had been so designed as to update the clinical skills with hands-on courses and didactic lectures on recent developments in areas such as Rotary Endodontics, Metal free ceramics, periodontal aesthetics, to name only a few. A nice blend of foreign and Indian specialists shared their wisdom and experience in a variety of topics which helped sharpen the clinical acumen of the participants. These contemporary Pre-Conference Courses tended to enable the delegates discern the dental stimulus in various disciplines of dentistry.

The organizing committee, headed by the energetic and efficient Dr (Prof.) L. Krishna Prasad and his team of dedicated personnel, left no stones unturned in trying to make this conference an excellent exposition of talent, technology and intellectual input. The committee needs to be given the highest compliments for the manner in which it went about meticulously planning, organizing and executing the whole event without any snag. The conference will be remembered for setting new landmarks in terms of number of participants, scientific papers and posters and also national and international trade exhibitors. According to the Organizing Committee, the state of the art Conference venue, auditorium and exhibition halls as well as the impressive infrastructure at the Exhibition Centre have enabled the Committee to offer a wealth of services to the delegates. It will remain a benchmark for all future conferences. To mark the occasion a souvenir was released.

Success of any conference is generally judged by the active participation of all members. There were quite a good number of enthusiastic participants numbering nearly 7000 in the three days of the conference. In all, the conference was a grand success.

Colgate-Palmolive offered as usual the principal sponsorship while many dental educational institutions and pharmaceutical companies sponsored different events.

Performance Awards

Performance in any field, no doubt, merits recognition. Recognition of performance, indeed, acts as a fillip to inspire the talented to aspire for higher levels of achievement. To encourage those exceptionally talented who excel in the performance of their official functions IDA has instituted quite a few awards to reward them. These are presented to motivate them to achieve higher levels of excellence in their own activity.

It's a matter of great pride for IDA members to feel happy that their performance in IDA's journey towards securing 'optimal oral health for all' has been appreciated and rewarded. IDA has maintained a glorious record of excellence in every field of activity undertaken. The awards are being given for contribution to the process of making IDA visible and for facilitating delivery of oral healthcare services to the community.

At the conclusion of the 67th annual conference at Hyderabad on 23 February 2014 several distinguished functionaries were presented with awards for their performance in 2013. These and other details are given elsewhere together with images of the distinguished IDA officials for their noteworthy contributions to secure IDA's goals. The detailed list of award winners is attached to the report (See Annex for details).

Election of New Office Bearers

Following the conclusion of the conference the results of the elections held to choose the office bearers were announced. Thus a new team of office bearers led by the incoming President, Dr Alias Thomas took over. The outgoing president, Dr Mahesh Verma, welcomed the new incumbent and installed him as the

President and handed over the reins of Presidency to him. Dr Alias Thomas will remain President for the period 2015-2016. Accordingly, the new team of office bearers headed by Dr. Dr Alias Thomas assumed office at the conclusion of the IDC 2014 at Bengaluru. Dr. Ashok Dhoble, continues as the Hon Secretary General. Dr T.R. Sudharshan, Dr Y.K. Pahariya, Dr. G. Ravindra Nath Reddy and Dr.Puneet Girdhar were respectively elected First, Second, Third and Fourth Vice Presidents. The other office bearers will remain unchanged. The incoming President, Dr. Alias Thomas, then introduced the new team of office bearers headed by him at an impressive close-in ceremony held on 15 February, 2015. The new office bearers were welcomed with garlands and the contributions of the outgoing officials were greatly appreciated.

IDA Student Activity

"It is not the student's aptitude but their attitude that will determine their altitude."

Students are the future of dental profession. Membership of IDA provides the student community the forum to discuss matters or important issues in dentistry. IDA is their ideal platform, as it provides them with numerous opportunities exclusively meant for expanding their knowledge and exhibiting their talent. It offers its student members several avenues for interacting with members and to share their experiences with their peers by exposing them to valuable information of great academic relevance. This privilege of IDA membership is open to all dental students.

IDA has realised that the younger students needed its support since students are the brightest prospects for the future. Therefore, IDA's emphasis is on programmes that appeal to a broad spectrum of dental students and contribute to their scientific thinking. By focusing on them and encouraging them IDA prepares the bright young students face the challenges of their professional future.

STUDENT CONFERENCES

A new orientation to separating the grain from the chaff and to identifying promising talents among the students

Members are aware that an important activity of IDA is that of hosting of the Annual Student Conference which plays an important role in developing leadership roles among students. Student Conferences offered the budding young dental students a great opportunity to understand each other and to interact and share their experiences, besides portraying their talent in academic as well as co-curricular activities. They are expected to help the students learn both academically and through the scientific programmes a plethora of educational sessions, presentations and orations. It provides an occasion to meet and mingle with students of other states at the social get together. Participation of students in conferences meant for them promotes a healthy interaction and develops a feeling of fellowship with prospective colleagues besides building organizational capabilities.

SCHOLARSHIPS

IDA-COLGATE BDS Merit Scholarships

Education is a progressive discovery of our own ignorance

In the field of academics, IDA-Colgate have instituted Gold Medals to be given as rewards to students topping the BDS final examination at the university level. Additionally, IDA-Colgate scholarships are awarded to students who top in each year of the BDS course at the college level. The college level scholarships to students who top at the BDS course in each year are a move to motivate students on their chosen vocational career and to enlighten them on their professional choice. During the year under review, only 26 colleges availed of BDS scholarships. A total number of 100 students received scholarships on the basis of their aggregate marks. The three top ranked students from each of the four year BDS academic course from participating dental colleges were granted scholarship of ₹.2500, ₹ 1500 and ₹ 1000 in that order, apart from a certificate of honour and recognition letter from Colgate

Reports on CDE, CDH, JIDA

Dr. Subhra Nandy
Chairman CDE

Report on CDE Activities 2014

*"It's not just about ideas
It's about making ideas happen"*

Dear Colleagues

I am pleased to present the report on Continuing Dental Education activities during the year under review.

According to CDE Regulations approved by the Dental Council of India and the Ministry of Health & Family Welfare, Government of India, all registered dental surgeons are to obtain 100 credit points over a period of five years calculated at 20 credit points of CDE per year. It will be essential to achieve a minimum of 15 and a maximum of 25 points a year. At the same time, 10 points for asepsis and infection control and 5 points for dental jurisprudence over a period of 5 years are mandatory.

In keeping with these regulations, and to assist our members, IDA has been organizing CDE programmes for their benefit. The CDE Programme reflected IDA's commitment to professional advancement of its members and delivery of quality service to the community.

I am very happy to present to you our report on CDE activities conducted during the year.

Under the IDA-Colgate sponsored CDE Programmes, 165 branches - 17 State and 148 Local – conducted 480 programmes ranging from one to a maximum of six programmes. In all 37 branches conducted the maximum number of CDE programmes. There were 183 local and 12 state branches which did not conduct any programme.

I take this opportunity to gratefully acknowledge the cooperation and support received from all concerned at IDA HO, State and Local Branches for the successful conduct of the CDE programmes.

Dr. C. Shivkumar
Chairman CDH

CDH Report 2014

*"Do something special for someone today Just give them
a smile and you will be amazed at How much of a difference it makes"*

We are pleased to present to you the report on the IDA-CDH activities carried out during the year. As usual, the popular programmes continued to be the IDA-Colgate "Bright Smiles Bright Futures" Programme, The Teacher Training Programme, etc., aimed at promoting oral health and hygiene through education and preventive measures. During the year, the IDA-Colgate 'Bright Smiles Bright Futures Programme' was implemented by over 100 branches from 23 states. The programme covered 2 million school children between the age of 6 and 12 years across 5000 schools in the country, including Teachers' Training and Parent's Orientation Programmes. Additionally, several dental check up programmes were conducted under National Oral Health Programme covering children, adults, women and the elderly seniors.

IDA is grateful to the members, student volunteers, quite a few dental colleges, dental technicians and laboratories for their valuable contributions to bring the smile on socially and economically weaker patients to make the programme a continuing success.

We take this opportunity to gratefully acknowledge the excellent cooperation and support received from all concerned at HO, the state and local branches without which a programme of this magnitude would not have been possible. The concerned officials of Colgate Palmolive, particularly Mr Hardik Jhaveri, Dr Mukund Kamat and Ms. Swarna Khopikar, deserve special thanks for their pro active role in the success of all these oral health programmes.

Dr. Suresh Meshram
Editor – Journal

JIDA Report

*"Some people will always throw stones in your path,
It depends on you what you make with them, Wall or Bridge?"*

Members are very well aware that following elections that were held coinciding with the 65th IDC in early 2012, a change in editor, printer and publisher of the official publication of IDA, i.e., the Journal of Indian Dental Association (JIDA), had been effected. Owing to certain technical procedures relating to the INR requirement of a 'no objection certificate', the new editorial committee took upon itself the task of restarting the journal to sub-serve the interest of members and the subscribers. JIDA issues are now being brought out regularly and on a timely basis. On account of the non-compliance of INR requirements by the previous editor IDA is not able to avail of the postal discount by resorting to the PATRIKA channel nor was it able to deliver copies to the erstwhile subscribers whose names were not handed over.

The editorial committee would like to profusely thank the subscribers for their patience and the authors, reviewers and printers for their cooperation and support.

Indian Dental Association

Statements of Accounts for 2013-2014

The Annual Report of The Hon. Treasurer For 2013 - 2014

It gives me great pleasure to present the audited statement of accounts for the year 2013-2014.

During the year, the Head Office had received a total income of Rs.4,41,79,533/- (Rupees Four Crores Forty One Lakh Seventy Nine Thousand Five Hundred Thirty Three Only). The excess of income over expenditure for the year had been Rs.97,40,000 /-(Rupees Ninety Seven Lakh Forty Thousand Only). IDA HO has a total number of Fourteen Fixed Deposit Receipts aggregating Rs.4,55,47,254/- (Rupees Four Crores Fifty Five Lakh Forty Seven Thousand Two Hundred Fifty Four Only) as on March 2014. The Income and Expenditure account for the year 2013-2014 is attached alongside.

I thank all office bearers of IDA HO for their cooperation and support.

Yours sincerely
Dr. Deepak Muchhala
Hon. Treasurer

Auditor's Report

I have audited the attached Balance Sheet of INDIAN DENTAL ASSOCIATION (HEAD OFFICE) as at 31st March, 2014 and also the attached Income and Expenditure Account of the Association for the year ended on that date annexed hereto.

The Association's management is responsible for the preparation of these financial statements that give a true and fair view of the financial performance of the Association in accordance with the Accounting Standards generally accepted in India. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error. My responsibility is to express an opinion on these financial statements based on my audit.

I conducted audit in accordance with auditing standards generally accepted in India. Those standards require that I plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. I believe that my audit provides a reasonable basis for my opinion.

Further to my comments and **subject to the notes on accounts annexed thereto**, I report that :

1. I have obtained all the information and explanations which, to the best of my knowledge and belief, were necessary for the purpose of my audit;
2. In my opinion, proper books of account as required by law have been kept by the Association, in so far as it appears from my

examination of the books;

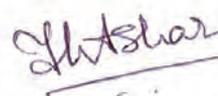

3. The Balance Sheet and Income and Expenditure Account dealt with by this report are in agreement with the books of accounts;
4. In my opinion and to the best of my information and according to the explanations given to me, the said accounts, read together with the notes thereon, give true and fair view in conformity with the accounting principles generally accepted in India :
 - a. In case of Balance Sheet, of the State of Affairs of the Association as at 31st March, 2014; and
 - b. In case of the Income and Expenditure Account, of the Surplus of the Association for the year ended 31st March, 2014.

IDA Notes Forming Part of Accounts for Year Ended 31st March, 2014

1. Accounts are maintained on cash system of accounting and Income and Expenses are accounted on receipt and payment basis except in respect of service tax liability and FDI 2014 event.
2. With respect to FDI 2014, Management of the association has decided to show the amount received against Registration fees, Sponsorship as Advance received and similarly payment made for all expenses to be shown as Advance paid, since the event FDI 2014 is to be held after the year under the audit.
Similarly balance in Service Tax Account is subject to reconciliation as the event FDI 2014 is held in the subsequent year and final liability for service tax will accrue in that year.
3. Fixed Assets are depreciated on written down basis at the rates prescribed as per Income Tax Act, 1961.
4. Details of Life Members admitted during the year are pending for reconciliation with the amount of Life Membership fees received. Hence, we are unable to comment on the correctness of Life Membership Fees shown under the head "Subscription" in the Income and Expenditure Account of Life Members Account.
5. The Outstanding Balance in respect of Closing Loans and Advances, Deposit, Investment, is subject to confirmation, reconciliation and adjustment, if any.
6. All the expenses are authorized and approved by the Trustees / Committees.
7. Figures are rounded off to the nearest Rupee.
8. Previous year's figures are regrouped and / or reclassified, wherever necessary, to make them comparable.

As per Report of Even Date.
